

## TESTBOY TV 950 Wallboxtester

The Testboy TV 950 is an EVSE charging pole tester that checks the most important functions of the charging station at once to ensure safe charging. This quick tester simulates a vehicle that is ready for charging, checks the plug interlocking and also shows the applied phases via LED display.

### BENEFITS

- > Checking the functionality of TYP-2 charging stations/wallboxes
- > Power supply via TYP-2 socket
- > Phase indication via 3 LEDs
- > Simulation of the vehicle states A, B & C
- > Can be used on all common wallboxes with and without permanently connected cable

### SERVICE

Press the lock button and plug in the TV 950 -> release the button, the device locks. Press the charge button -> the wallbox switches free, the phase indicator lights up. Wallbox is completely tested for function. Press the lock button to remove the device from the wallbox.
