

SPEKTRA TRACK LED 2700K 15° - 55° TRE DIM GI

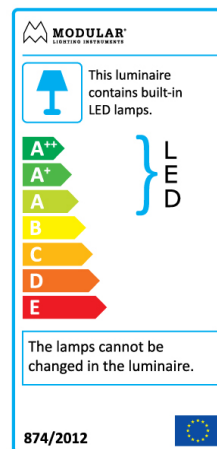

“We believe in objects with meaning, so that they give meaning to everyday lives,” says French designer Florent Coirier. Inspired by this belief, Coirier designed Spektra: a very precise Modular trackspot for retail environments. Spektra is the first trackspot in the Modular portfolio with an adjustable zoom lens. Users can easily adjust the beam angle and change the inclination of the luminaire, ensuring that it only highlights targeted areas. The light quality is excellent (CRI 90 or more), mimicking natural light – just what retailers need to put their products in the spotlight.
