1. USE

Automatic switches without neutral, with infrared detection. Switches automaticaly on in case of movement detection and low natural light level.

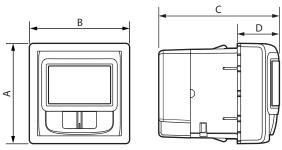

Installation in box depth 50 mm recommanded (40 mm minimum). To be equipped with plate.

Flush mounting.

5. OPERATION (continued)

■ 5.3 Operation with a sensor

AUTO mode:

The lighting switches on automatically when presence is detected if there is insufficient natural light.

The lighting switches off automatically if no presence is detected at the end of the set time delay, or if there is insufficient natural light.

Any new detection triggers an automatic switch-on if there is insufficient light.

Manual ON mode:

The user must switch on the lighting manually and the load remains permanently on.

Manual OFF mode:

The user must switch off the lighting manually and the load remains permanently off, even if an auxiliary input pushbutton request is enabled.

■ 5.4 Operation with two sensors in parallel

6. TECHNICAL CHARACTERISTICS

■ 6.1 Mechanical characteristics

Protection against impact: IK 04

Protection against solid bodies and liquids: IP 40 (monted) - IP 20 (without rocker)

■ 6.2 Material characteristics

Colour: - White RAL 9003

- Ivory RAL 1013

- Aluminium matt chrome painting

Matierial: - Cover plat ABS - Halogen free

- UV resistant

Self-extinguishing: + 850° C / 30 s for insulating parts holding live parts in place + 650° C / 30 s for other parts made of insulating materials.

■ 6.3 Electrical characteristics

Voltage: 110 - 230 V~ Frequency: 50-60 Hz Stanby consumption: 0.035 W

Important: Take account of transformer losses when calculating power. Transformers must be loaded at more than 60% of their power. Note: Possibility to mix any type of load on the same circuit.

■ 6.4 Climatic characteristics

Storage temperature: - 20° C to + 70° C Operating temperature: - 5° C à + 45° C

7. CLEANING

Keep the lens clean.

Surface cleaning with a cloth.

Do not use: acetone, tar remover, trichlorethylene.

Maintenance with the following products: Hexane (EN 60669-1), Methylated spirit, Soapy water, Diluted ammonia, Bleach diluted to 10%, Window cleaning products.

Caution: A preliminary test should be carried out if other specificleaning products are to be used.

8. STANDARDS AND APPROVALS

Compliance with standards of installation and manufacturing. Refer to e. catalogue..
